KeyInCloud

Centralized Property Management

Break free from the constraints of a single view and or multiple accounts in order to manage all your devices and access users. The centralized dashboard allows you to apply access users and schedules across all your locks at once.

Guest Access Automation

Through integrations with rental listing partners such as Airbnb, HomeAway, Guesty & more, automate the guest access process. When bookings are approved, guest information is imported into your KeyinCloud account where access codes are created on your lock and customized emails & notifications are sent to your guests.

Kwikset

Centralized Access Management for Vera supported Locks

Advanced Remote Access Control

KeyinCloud enables a deeper access control feature set for your existing locks including temporary guest codes, access schedules, group management and more.

Tenant Management

KeyinCloud allows Property Managers to give administration rights to their tenant's individual locks with an advanced configurator specifying access level, payment options and more.

KeyInCloud

Centralized Access Management for Vera supported Locks

Centralized Access User Management

- View and manage all access users across all your locks in a single view.

Mass User Management (assign to groups/locations)

- Grant or revoke access to multiple locks in a single step instead of one lock at a time.

Guest Code Functionality

- Create time limited codes that no longer work after expiration.

Access Schedules

- Create weekly schedules in order to limit employee access to specified times of the week (M-F, 9-5).

Full featured notification management

- Set up alerts for specific events including low battery warnings and unlocks.

Expanded hardware Interoperability

- Control any door & common door functionality.

Advanced Account Member Roles & Permissions

- Allow employees to administer specific locations and locks or allow tenants to control their single lock.

Listing Company integrations

- automate your access control by integrating with Airbnb, HomeAway or other partners.

Partner Integrations

- including Airbnb, HomeAway, Guesty, Barefoot, Streamline, Vacation Rental Desk, iCal Feeds & more.

Advanced Reporting

- filter access logs across all your locks, view administrator logs and export reports
